LỜI GIỚI THIỆU

Xin giới thiệu đến bạn đọc cuốn "*Trắc nghiệm kiến thức tiếng Anh 8*" của thạc sĩ Võ Tâm Lạc Hương. Đây là tài liệu được biên soạn nhằm phục vụ đối tượng là học sinh khối lớp 8 và giáo viên THCS theo chương trình và sách giáo khoa mới của Bộ GD&ĐT, với mục đích giúp các em học sinh ôn tập và hệ thống hóa các kiến thức đã học, các thầy cô giáo có thêm tư liệu để soạn giảng và kiểm tra môn học này.

Sách được trình bày khá rõ ràng và bám sát theo từng đơn vị bài học (unit) và được thể hiện dưới các dạng bài kiểm tra trắc nghiệm khách quan. Trọng tâm của sách gồm những phần:

- Cách đọc (pronuciation)
- Từ vựng (vocabulary)
- Ngữ pháp (grammar)
- Khả năng hiểu biết nội dung một đoạn văn (comprehension)

Những ngữ liệu xây dựng các bài tập ở đây được tác giả lấy ra từ những nội dung của bài học trong sách giáo khoa với nhiều mức độ khó, dễ và bao quát được các kĩ năng ngôn ngữ khác nhau. Và để đạt được các kết quả tốt nhất, học sinh cần kiên trì tự làm các bài tập đã cho trước khi xem đáp án ở cuối cuốn sách nhằm kiểm tra lại các phần đã làm.

Chúng tôi tin rằng cuốn "*Trắc nghiệm kiến thức tiếng Anh 8*" của thạc sĩ Võ Tâm Lạc Hương sẽ giúp cho các thầy cô giáo thêm một tư liệu quý, các em học sinh sẽ có cơ hội kiểm tra kết quả học tập của mình và chuẩn bị tốt cho việc làm bài kiểm tra học kì...

Mặc dù tác giả đã có những cố gắng trong việc biên soạn song khó tránh khỏi những khiếm khuyết, chúng tôi rất mong nhận được nhiều ý kiến đóng góp của các thầy cô giáo, phụ huynh và học sinh để những lần tái bản sau sách sẽ được tốt hơn.

Mọi góp ý xin gửi về:

IV. Read the text and choose the best answer for each question.

John Fisher, a builder, and his wife Elizabeth wanted more living space, so they left their small flat for an old 40-metre-high castle tower. They have spent five years turning it into a beautiful home with six floors, winning three architectural prizes.

"I love the space, and being private," Elizabeth says. "You feel separated from the world. If I'm in the kitchen, which is 25 meters above the ground floor, and the doorbell rings, I don't have to answer it because visitors can't see I'm in!"

"There are 142 steps to the top, so if I go up and down five or six times a day, it's very good exercise! But having to carry heavy things to the top is terrible, so I never buy more than two bags of shopping from the supermarket at a time. Apart from that, it's a brilliant place to live."

“When we first saw the place, I asked my father’s advice about buying it, because we couldn’t decide. After paying for it, we were a bit worried because it looked awful. But we really loved it, and knew how we wanted it to look.”

“Living here can be difficult - yesterday I climbed a four-meter ladder to clean the windows. But when you stand on the roof you can see all the way out to sea on a clear day, and that’s a wonderful experience. I’m really glad we moved.”

31. What is the writer trying to do in the text?

IV. Read the text and choose the best answer for each question.

This is a story about my grandmother. She was my favorite grandmother and the best grandmother in the world.

Everyone I used to know loved my Grandma because she was kind to everyone. She kept the house in very nice order and whenever one of my uncles or aunties got married or something they could leave all the arrangements for my Grandma. She made everything look so easy and perfect.

But a very, very sad thing happened round about August 1974. She started to get sick. My grandfather, aunties and uncles were really worried about Grand's health, and every day they used to feed her and pray for her. They did everything, but one day in November she died in hospital. It was a shock to everyone because they all loved her so much. When Grandma was dead, everything seemed to change. And when Christmas came that year, it was quieter than other Christmas because Grandma wasn't there and everything was different. Whenever my Grandpa was by himself, he used to stay in his room and cry to himself. Sometimes when Mum saw my Grandpa unhappy, she invited him to stay over at our place. But still nothing will ever be the same without our beloved grandmother whom everyone loved. I will always remember her.

31. Why was her grandmother loved by so many people?

IV. Read the text and choose the best answer for each question.

Many people now think that teachers give pupils too much homework. They say that it is unnecessary for children to work at home in their free time. Moreover, they argue that most teachers do not properly plan the homework tasks they give to pupils. The result is that pupils have to repeat tasks which they have already done at school.

Recently in Greece many parents complained about the difficult homework which teachers gave to their children. The

parents said that most of the homework was a waste of time, and they wanted to stop it. Spain and Turkey are two countries which stopped homework recently. In Denmark, West Germany and several other countries in Europe, teachers cannot set homework at weekends. In Holland, teachers allow pupils to stay at school to do their homework. The children are free to help one another. Similar arrangements also exist in some British schools.

Most people agree that homework is unfair. A pupil who can do his homework in a quiet and comfortable room is in a much better position than a pupil who does his homework in a small, noisy room with the television on. Some parents help their children with their homework. Other parents take no interest at all in their children's homework.

It is important, however, that teachers talk to parents about homework. A teacher should suggest suitable tasks for parents to do with their children. Parents are often better at teaching their own children!

IV. Read the text and choose the best answer for each question.

I'm interested in sport, especially athletics, and I run seven or eight kilometers every day. I particularly enjoy cross-country running, where you have to run across fields, jump over streams and so on. While I'm running I think about all sorts of things, and at the end of a run I'm sometimes surprised to find that I've managed to solve a problem that was on my mind.

Next year I'm going to try the London Marathon. It's a long, hard race - 26 miles, or 42 kilometers - and you have to be tough to finish, but I very much want to do it. I worry a bit about getting old, and I'd like to prove to myself that I'm still almost as fit as I was twenty years ago.

I'm interested in mountaineering as well as running. I'll never become an expert climber, but I know what I'm doing in the mountains. I successfully completed a course in snow and ice climbing when I was younger; and I've done a series of easy climbs in the Alps during the last few years. My wife doesn't share my interest in mountains. She agreed to go climbing with

me once, but she found that she felt ill as soon as she got above 1,000 meters.

IV. Read the text and choose the best answer for each question.

This museum is in the center of the town, a few meters from the cathedral, and near the market. It contains dolls, dolls' houses, books, games and pastimes, mechanical and constructional toys. In this collection there are toys made by all sorts of toy manufacturers from the most important to the smallest, including the most ordinary toys and the most precious. There are also records of children's pastimes over the last hundred and fifty years.

Most major manufacturing countries of Europe had toy industries in the last century: French and German factories produced millions of toys each year. Many collectors of toys think that the second half of the nineteenth century was the best period for toy production and the museum has many examples of toys from this period which are still in perfect condition. There is now a **growing** interest in the toys of the 1920s and 1930s and as a result of this the museum has begun to build up a collection from these years. Visitors to the museum will find that someone is always available to answer questions - we hope you will visit us.

IV. Read the text and choose the best answer for each question.

The state of Kansas is called the "Bread Basket of America" because it ranks first in wheat growing and flour milling. In addition, there are hundreds of cattle ranches in western Kansas, some of which cover 50,000 acres. The state is larger than most states, but rather thinly populated.

In pioneer days, many settlers passed through Kansas seeking rich land and gold farther west. Looking upon Kansas as a “useless waste of land”, they refused to settle there. However, when Kansas *joined* the Union in 1861 as a free state opposed to slave labor, the population began to increase. Finally, the railroads helped to attract settlers by selling them inexpensive land.

31. What did the early pioneers think about Kansas?
 - A. They thought there was gold in western Kansas.
 - B. They found slave labor too expensive.
 - C. They considered the land unproductive.
 - D. They liked the rich soil.

IV. Read the text and choose the best answer for each question.

Laird Gogins is a fifty-seven-year-old inventor who has developed a device to harness the power of the wind. He claims that his invention could eventually provide all the electrical power needed by the United States. A network of his wind machines across country could transfer electricity produced in a windy spot to a place where the air is still. Just one of Gogins' wind machines will produce eighty megawatts of electricity, which is ten times the power produced by all the windmills in the United States today. In addition, the wind machine is cheaper to build than a windmill. Gogins says that if just one percent of the available wind power in the United States were **captured**, it could provide one hundred percent of the electrical power now consumed. However, the inventor admits that the wind will probably never become the country's sole power source.

31. What does Laird Gogins do as stated in the talk?

A. He's the director of a wind power station.

B. He's an inventor.

C. He surveys all the power plants in the United States.

D. He produces machines.

A. It is cheaper to construct than a windmill.

- B. It will produce eighty megawatts of electricity.
- C. It could produce much more power than the windmill.
- D. It is currently providing all the electrical power needed by the United States.

34. What does Gogins admit about his invention?

- A. He believes that the windmill is more practical than his machine.
- B. He believes that a network of his machines would be incapable of transferring electricity from one place to another.
- C. He believes that his machine will probably never be the only device used to produce power in the United States.
- D. He believes that his machine will never be popular outside the United States.

My Son is located at the foot of Mount Chua, in a narrow valley surrounded by mountains, in Quang Nam Province. It has attracted numerous tourists and Oriental art researchers.

My Son was built in the 7th and 8th centuries in dedication to Siva, the goddess of destruction and reproduction. Following the Indian mode of thinking, the ancient Champa people chose to build their holy towers in a mountainous area away from residential places. Visitors to My Son are impressed by the serene beauty of this spiritual world of the Cham people. They can see Goddess Siva on a pedestal representing fertility and femininity. The towers are built of brick and adorned with sandstone decorations. The bricks have stood up to sunlight and rain for hundreds of years though they were not glued by any sticky substance.

My Son Sanctuary is an exceptional example of cultural interchange, with the introduction of the Hindu architecture into Southeast Asia. The World Heritage Committee has considered My Son as having outstanding universal values.

IV. Read the text and choose the best answer for each question.

In 1872, in America, Julia Ward Howe, the author of "The Battle Hymn of the Republic", suggested the idea of Mother's Day. However, Anna Jarvis of Philadelphia is credited with creating Mother's Day in 1905. Anna Jarvis campaigned for Mother's Day as a tribute to her mother, who had tried to

establish Mother's Friendship Day to help heal the scars of the Civil War in America.

In 1910, West Virginia became the first state to adopt a formal holiday to recognize mothers. A year later, nearly every state officially marked the day of celebration. In 1914, President Woodrow Wilson proclaimed Mother's Day as a national holiday, to be held on the second Sunday of May.

Today, Mother's Day is celebrated in many countries throughout the world, although the celebrations do not fall on the same day in every country.

Mother's Day is celebrated in various ways, depending on the country, the family, and the mother. Many families honor mothers by dining out, giving flowers, sending cards, giving gifts, and visits. Additionally, Mother's Day is reported to be one of the busiest days of the year for telephone calls.

Mother's Day should be every day. Mothers nurture us, teach us, protect us, and make us feel special. Mothers are the people in our lives who are most responsible for the way we grow and mature.

IV. Read the text and choose the best answer for each question.

Paper is named for papyrus, a reedlike plant used by ancient Egyptians as writing material more than 5,000 years ago. The Chinese invented the paper that we use 2,000 years ago.

A piece of paper is really made up of tiny fibers, not unlike a piece of material. The fibers used in paper, however, are plant fibers, and there are millions of them in one sheet. In addition to the plant fiber, dyes and additives such as resin may be used. Dyes can make the paper different colors; resins may add weight and texture.

Where do these fibers come from? The majority of paper is made from the plant fiber that comes from trees. Millions are cut down, but new trees are planted in their place. Paper may be also made from things like old rags, or pieces of cloth. Wastepaper, paper that has been made and used, can be

turned into recycled paper. This recycling process saves forests, energy and reduces air and water pollution.

V. Read the text and choose the best answer for each question.

Because goldfish can be kept easily in small ponds and aquariums, they make good pets, but like any other pets, they must have proper care and the right kind of place to live.

A two-inch fish requires a minimum of two gallons of water containing sufficient oxygen to support life. Some oxygen will make its way into the water of an aquarium from the air that touches the surface, plants in an aquarium also help to furnish oxygen. Snails help to keep an aquarium clean. Thus, with plenty of plants and snails, the water in an aquarium does not have to be changed frequently.

It is important that goldfish not be overfed. They can be fed such things as dried insects and shrimp in addition to commercially prepared goldfish food, but they should never be fed more than once a day. Even then, they should not be given more food than can be consumed in about five minutes.

51. Which of the following helps supply goldfish with oxygen?

V. Read the text and choose the best answer for each question.

Parents whose children show a special interest in a particular sport have a difficult decision to make about their children's careers. Should they allow their children to train to become top sportsmen and women? For many children it means starting very young and school work, going out with friends and other interests have to take second place. It's very difficult to explain to a young child why he or she has to train for five hours a day, even at the weekend, when most of his or her friends are playing.

Another problem is of course money. In many countries money for training is available from the government for the very best young sportsmen and women. If this help cannot be given it

means that it is the parents who have to find the time and the money to support their child's development - and sports clothes, transport to competitions, special equipment etc. can all be very expensive.

Many parents are understandably worried that it is dangerous to start serious training in a sport at an early age. Some doctors agree that young muscles may be damaged by training before they are properly developed. Professional trainers, however, believe that it is only by starting young that you can **reach** the top as a successful sports person. What is clear is that very few people do reach the top and both parents and children should be prepared for failure even after many years of training.

51. This is from _____.
- A. a letter
 - B. an advertisement
 - C. a sports diary
 - D. a newspaper article
52. What is the writer's intention?
- A. To inform us about training.
 - B. To discuss training methods.
 - C. To give details about training costs.
 - D. To suggest a training program.
53. How do some governments help young people who are good at sport?
- A. They give them money for training.
 - B. They give them overseas training.
 - C. They give them sports clothes and special equipment
 - D. They give them good positions in the government.
54. According to the passage, _____.
- A. one can only become a top sportsperson by starting young but it is very expensive
 - B. one can only become a top sportsperson by starting young and all parents are willing to spend their money and time on the training

- C. one will have a lot of friends and money when one starts young to train to become a top sportsperson
- D. early training helps to develop young muscles without ever, damaging them
